Vice President

Defend the organization and build business resilience in 2025

Gain actionable insights into the challenges of increasingly complex cyber environments.

We are living through a period of radical change. Geopolitical tensions are redefining the threat landscape for public and private organizations. Economic uncertainty is creating new cost pressures. AI is entering a new phase of turbulence. **Gartner Security & Risk Management Summit 2025** brings together chief information security officers (CISOs), cyber-risk and security leaders, security operations managers, and their teams to explore the evolving landscape of risks and strategies.

Gain actionable insights into the challenges of increasingly complex cyber environments, addressing strategy around these hot topics:

Cybersecurity leadership.

Learn how to excel in your role in the face of mission-critical challenges.

Application and data security.

Explore the latest developments and future roadmaps to traditional application and data security problems.

AI. Effectively integrate AI into your roadmap and navigate the AI hype.

Infrastructure and cloud security.

Examine the evolving landscape of AI, privacy and infrastructure security solutions.

Cyber-risk management. Outpace potential threats, fortify your defenses and mitigate risks tied to privacy, supply chains and more.

Join us for the premier conference for cybersecurity and risk leaders

What's new for 2025

- **New spotlight tracks.** Our New To Role (NTR) and Public Sector spotlight tracks highlight specific content within the overall agenda. Focused on CISOs, the NTR spotlight track offers critical insights on an executive's first year in the role, how to deliver results quickly, cultivate stakeholder relationships, avoid pitfalls, prioritize projects and make an immediate impact. The Public Sector spotlight track explores the unique skills and technical capabilities required by cybersecurity programs in government organizations.
- **More content on GenAI and cybersecurity.** Our AI spotlight track covers how to prepare for AI's impacts in four areas: defending using AI enabled tools; preparing for attacks enabled by GenAI; enabling enterprise initiatives to "build" AI applications securely; and managing how the organization "consumes" AI.
- **Featured topic: Postquantum cryptography.** This is an emerging key security area that organizations will be affected by, addressing topics such as: which applications use cryptography, how it's used and who makes decisions about it. New sessions discuss safely migrating to new quantum-safe cryptographic algorithms to mitigate the risks of compromising application and data security.
- **More content on cyber engagement with senior management and boards.** Discuss topics focused on elevating the power skills necessary for influencing key stakeholders and transforming cybersecurity insights into compelling boardroom presentations.

Who should attend

CIOs, CISOs and senior IT, security and risk executives

- CISOs
- Chief security officers (CSOs)
- Chief risk officers (CROs)

Security directors, managers and security leaders

- Cybersecurity chief of staff
- Cyber-risk management leaders
- IT security managers
- Data security managers
- Application security managers
- Infrastructure security managers
- Security operations managers
- Business continuity managers
- Privacy/data protection officers
- Business information security officers (BISOs)

Architects, planners and tech leaders

- Security architects
- Engineers and developers
- Technical professionals

How to engage

Expanded networking opportunities

Collaborate and build impactful connections in new Peer Meetups, workshops around mindfulness to let you reconnect and events geared toward connecting first-time attendees.

Attend 120+ insights-backed, expert-led sessions on the trends and tech transforming cybersecurity.

Connect with 40+ top Gartner cybersecurity experts to discuss priorities and validate your strategy.

Get inspired by some of the best speakers in the world in innovative guest keynote sessions.

Mingle with 2,600+ fellow cybersecurity leaders in Peer Meetups, interactive sessions, meals and impromptu conversations.

Experience the latest technologies from 100+ leading solution providers in the Exhibit Showcase.

Learn from the successes of world-class peers at industry-leading organizations in Executive Story sessions.

Keynotes

Guest keynote

Paul Redmond

Director of Student Experience and Enhancement, University of Liverpool, England

Navigating the Multigenerational Workplace

Today's workplace is more demographically diverse than ever. For the first time, four generations are working together, sharing the same workplaces, working on the same projects, vying for the same career opportunities. As a manager, you need to understand how to get the best from your multigenerational teams. This presentation will show you how to do it, and how, by harnessing "DQ" (digital intelligence) and "EQ" (emotional intelligence), you and your team can achieve excellence.

Rachel Botsman

Global Trust Expert

How to Trust and Be Trusted

Trust is both the foundation and the result of a strong culture, and it's fundamental to creating a better world of work. Yet, with the dynamics of teams in a state of flux, it has never been more challenging to keep people connected, engaged and aligned with company values — and with each other. In this session, Rachel challenges assumptions and reframes how trust really works. You get to know clear frameworks and actionable ideas on how to put trust at the heart of your leadership and culture, and learn how to behave in trustworthy ways.

Christine Lee

Vice President

Leigh McMullen

Distinguished Vice President

Opening Keynote: Harness the Hype — Turning Disruption Into Opportunity

Our organizations understand they can't ignore cybersecurity. In our turbulent environment, the extremes of unbridled technology optimism and excessive preoccupation with risk endanger us. Hype, whether driven by AI, emerging technologies, geopolitical changes or the latest headline-grabbing cyberattack, threatens to derail strategic objectives and the partnership between cybersecurity and the rest of the business. This keynote helps exploit hype's power to drive your cybersecurity program and the resilience of your organization.

Kristin Moyer

Distinguished Vice President

How to Increase Board Confidence in Cybersecurity

Boards lack confidence in their cybersecurity oversight abilities and those of their CEOs. This lack of board confidence spells trouble because it can amplify pressure for unrealistic results, lower investment appetite and ultimately reduce business resilience. This keynote shows CISOs how to empower a confident, cyber-resilient board.

Plan your experience

Agenda tracks

A**Cybersecurity Leadership**

Cybersecurity leaders face disruptions on multiple fronts: technological, organizational and human. This track helps you to overcome day-to-day leadership challenges, make well-informed strategic decisions and keep your organization secure in turbulent times.

B**Cyber Risk Management**

Excelling in risk management is not just essential — it's imperative. This track delivers insights to help you outpace potential threats, fortify your defenses and navigate and mitigate the intricate risks tied to privacy, supply chains and more.

C**Infrastructure Security**

Securing infrastructure is key to any organization's security strategy, whether you are on-premises, in the cloud or hybrid. This track explores the evolving landscape of security solutions to secure your infrastructure and defend your organization from attack.

D**Application and Data Security**

Applications and the data they support are critical security components for every organization. This track covers key technologies and approaches to protecting your data and securely building, implementing and operating your applications.

E**Cybersecurity Operations**

Security and risk management leaders depend on security operations to preserve their company, while business requires them to tolerate higher risks. This track explores best practices and emerging approaches to reducing exposure to threats and minimizing disruption caused by inevitable incidents.

Spotlight tracks

Technical Insights for Security Professionals

The Technical Insights spotlight track leverages Gartner for Technical Professionals insights to deliver actionable advice for practitioners by discussing the architectures, best practices, pitfalls, tools and techniques that enable operational success.

Identity and Access Management

IAM has become the cornerstone of business enablement and enterprise agility. This track gives security leaders insight into the latest IAM strategies, trends and technologies.

Artificial Intelligence

AI's rapid evolution presents many cybersecurity risks and opportunities. Learn how to effectively integrate AI into your cybersecurity roadmap and navigate the AI hype to create real value.

Public Sector

Government agencies are among the top targets for attack and face constant threats. With a mix of presentations and discussions, this track explores the unique skills and technical capabilities required by cybersecurity programs in government organizations.

New To Role

Most organizations expect their NTR executives to deliver results quickly. Learn how to cultivate key stakeholder relationships, avoid pitfalls, prioritize projects and make an immediate impact on your organization.

Navigating the Current Environment

We are operating in an environment characterized by an increasingly complex threat landscape, geopolitical uncertainty, tariffs and cost pressures. Learn how to navigate these challenges and enhance your organization's resilience.

The CISO Circle Program

Designed specifically for CISOs and CROs, the CISO Circle Program offers a curated executive experience, delivering presentations, discussions and networking opportunities throughout the conference. We recommend applying for this program* when you register for the conference, as seats for CISO Circle sessions are limited and fill up quickly. Make sure you don't miss out on this exclusive experience.

What's included

- **The opportunity to network and connect** with a community of CISOs and CROs
- **Exclusive interactive sessions** focused on the most pressing priorities of CISOs and CROs
- **Priority access** to book interactive sessions and one-on-one meeting(s) with a Gartner expert
- **CISO meals**, featuring keynote presentations from visionaries and industry leaders

[Learn More →](#)

*Qualification criteria apply for the CISO Circle Program.

“This conference is the most direct group of sessions that directly impact my job. This is my fifth year, which is a testament to how I feel this helps me. The CISO sessions are always highly valuable.”

Mario Colon, Global IT Director, Cybersecurity, EBI

Interact with experts

Gartner one-on-one meeting*

Complimentary consulting with one Gartner expert of your choice

Ask the Expert sessions*

Pose tough questions to a Gartner expert in an intimate, topic-driven session.

Keynotes

Let the experience of visionaries, innovators and renowned thought leaders inspire you — and reframe your thinking about business and leadership.

Network with peers

Roundtables*

Moderated by Gartner experts for exchanging ideas and best practices with your peers

Workshops*

Small-scale and interactive — drill down on specific topics with a how-to focus

Executive Stories

Accelerate your initiatives by sitting down with peers to hear their leadership stories, real-world challenges, success factors and lessons.

Social engagements

Unwind, learn from peer experiences and grow your network during planned Meetups, receptions and special events.

Exhibit Showcase

Show floor

Use this interactive environment to gain insight from subject matter experts, explore new products and services, and engage in peer-to-peer exchanges. Navigate more easily and organize providers according to their focus.

Solution Provider sessions

Make investment decisions based on insights from case studies, thought leadership presentations and live interactions with exhibitors.

Theater sessions

Get a snapshot of the current solution landscape. Exhibitors reveal products and Gartner experts present findings based on Gartner Magic Quadrant™ insights and the Gartner Hype Cycle™ methodology.

Face-to-face solution provider meetings

Meet with the solution providers that interest you most, and walk away with a shortlist and actionable solutions.

*Preregistration is required. These sessions are available to end users only; space is limited.

Registration and pricing

What's included

In addition to five tracks of the latest Gartner insights, your conference registration fee includes complimentary access to these special features:

- **One Gartner one-on-one meeting***
- **Workshops***
- **Roundtables***
- **Exhibit Showcase**
- **Meals and networking receptions**

*Preregistration is required. These sessions are available to end users only; space is limited.

Group Rate Discount

Maximize learning by participating together in relevant sessions or splitting up to cover more ground, sharing your take-aways later.

Complimentary registrations

- 1 for 3 paid registrations
- 2 for 5 paid registrations
- 3 for 7 paid registrations
- 4 for 10 paid registrations

For more information, email GlobalConferences@gartner.com or contact your Gartner representative.

Gartner conference tickets

We accept one Gartner conference ticket for payment. If you are a client with questions about tickets, please contact your sales representative or call +44 80 0066 8209.

Gartner Conference Navigator

Gartner Conference Navigator helps you organize, view and custom-create an agenda based on:
