

Gartner Application Innovation & Business Solutions Summit

14 – 15 September 2026 | London, U.K.
gartner.com/eu/apps

Gartner for Technical Professionals

Equip your technical professionals with the insights, guidance and tools needed for the implementation of your strategy.

Gartner for Technical Professionals (GTP) equips **technical application leaders** with the **practical, implementation-focused guidance** they need to deliver outcomes faster, avoid costly missteps, and accelerate adoption of AI-driven architectures and tools.

At Gartner Application Innovation & Business Solutions Summit, technical professionals gain access to the entire agenda which includes, **deep technical insights, reference architecture and step-by-step frameworks** that directly support execution on key initiatives — from AI engineering to integration and modern application architectures.

Key priorities we help you solve:

- **Build and deploy effective AI agents** with proven practices for moving from prototypes to production-ready, scalable AI agent implementations.
- **Maximize AI agent effectiveness** by strengthening system context and documentation practices, enabling more aligned, reliable and scalable AI-driven outcomes.
- **Minimize AI-related risk** through proactive threat modeling and adversarial thinking, enabling organizations to identify vulnerabilities early and build more secure, resilient AI systems.
- **Modernize API strategies for the agentic AI era** by tracking shifts in MCP, A2A, UTCP, REST and other emerging patterns reshaping integration.

How GTP supports technical professionals year-round

GTP provides continuous, execution-ready support across your initiatives.

- **Reference architectures:** Blueprint complex systems with ready-to-adapt architecture patterns.
- **Planning guides and decision frameworks:** Prioritize initiatives aligned to key technical and market trends.
- **Technical assessments and solution criteria:** Evaluate tools and platforms based on in-depth technical criteria.
- **One-on-one analyst guidance:** Validate decisions, review architectures and troubleshoot implementation challenges.
- **AskGartner and AI-powered tools:** Access instant, contextual insights tailored to your role and domain.
- **Implementation toolkits and templates:** Reduce delivery time and improve consistency with reusable assets.

Pricing

Standard price: €3,725 + VAT

Public-sector price*: €2,925 + VAT

*Eligibility for the public-sector price will be verified; proof of public-sector status will be required. Price cannot be applied retroactively. "Public sector" definition: National government, state or local government, public administration.

If you are a client, please contact your account executive regarding tickets that may be available to your organization.

Recommended Technical Insights track sessions:

Sovereign AI: What You Need to Know to Host LLMs and Agents Privately
Explore the strategies, governance and infrastructure needed to securely deploy AI agents and LLMs in private environments.

The System Engineering Renaissance
Explore how stronger system design, better context management and high-quality documentation are becoming essential to unlock real AI value and improve agent performance.

Secure AI Before AI Breaks Everything
Learn how to identify and mitigate AI risks using threat modeling and adversarial thinking before vulnerabilities lead to serious impact.

Battle of the APIs 2026
Examine the evolving API landscape in the era of AI, including new standards and how API management is converging with agent governance.

Top 5 Practices for Building and Deploying Successful AI Agents
View the five practical strategies to move AI agents from experimentation to production and deliver meaningful business value.

How to Evaluate Copilot, ChatGPT, Gemini and Other Enterprise AI Assistants
Get guidance on selecting the right enterprise AI assistant by comparing platforms, capabilities and key evaluation criteria.

Ask the Analyst: API Security From the Attacker's Point of View

Ask the Analyst: Choosing Platforms for Building and Operating AI Agents

Gartner one-on-one meeting

Included in your conference registration is a 30-minute one-on-one session with a Gartner analyst. Get guidance tailored to your most pressing challenges. Here are the analysts who are available for one-on-ones, with experience in advising technical professionals on strategy, trends and technology frameworks for success:

Erin Khoo
Director Analyst

Roy Triesscheijn
Director Analyst
