|------------|--------------|--|---|------------------------|---------------------|--|--|-----------------|-------------------------|---------------|----------------------|--------------|-----------|-------------------|
| ERAC26 | SLRD1 | Senior Leadership Circle Research Discussion: Elevating the Impact of the Enterprise Risk Committee | Heads of ERM are concerned about the quality and impact of their interactions with the executive risk committee (ERC). Too often, interactions with the ERC feel stale. Attend this research discussion for Heads of ERM to understand the most important objectives for highly successful ERCs, how to enable those objectives and how to ensure ERC meetings are both engaging and drive to meaningful improvement in risk outcomes. | Matt Hoyles (Lead) | Research Discussion | E: Enhancing Executive Leadership and Influence | Business Management and Organization | Group Live | Advanced | None | None | 2.4 | 9/15/2026 | 11:00AM - 1:00PM |
| ERAC26 | 11a | AI in Risk Intelligence Tools: Promising, Powerful — But Proceed with Caution | AI is everywhere in risk management conversations — but hype and reality are still miles apart for most organizations. This session cuts through the noise and gets practical: what AI in risk management tools actually does today, where it delivers real value and the concrete steps you can take to move forward with confidence. | Nicholas Sworek (Lead) | Breakout | A: Realizing Value from Technology and Analytics | Computer Software and Applications - Non-Technical | Group Live | Intermediate | None | None | 0.6 | 9/15/2026 | 11:00am - 11:30am |
| ERAC26 | 11b | 2027 Audit Plan Hot Spots Overview | This session will reveal the key findings from Gartner’s 2027 Audit Plan Hot Spots research. Attendees will get insight on the latest risk trends impacting audit plans and can use the session to benchmark and inform risk coverage priorities for the year ahead. | Daniel Ryntjes (Lead) | Breakout | B: Accelerating Response to Emerging Risks | Auditing | Group Live | Overview | None | None | 0.6 | 9/15/2026 | 11:00am - 11:30am |
| ERAC26 | 11c | Audit 2030: Key Trends Shaping the Future of Internal Audit | By 2030, forces within and beyond audit will reshape how audit operates and delivers value. With relentless technological innovation, evolving skill needs and heightened regulatory scrutiny, the risk environment is changing faster than ever before and internal audit must change with it. Attend this session to discover what the future of internal audit will bring and how to bridge the gaps to get there. | Stephen Osborne (Lead) | Breakout | C: Transforming Functional Effectiveness | Business Management and Organization | Group Live | Overview | None | None | 0.6 | 9/15/2026 | 11:00am - 11:30am |
| ERAC26 | 11d | Connector ERM: Elevating Risk Owner Performance | Many risk owners fall short of ERM leaders’ performance expectations. This underperformance can distort senior leaders’ view of the risk landscape, result in insufficient or misdirected mitigation efforts, and, ultimately, lead to risk events. Join this session to learn how to connect risk owners to the information and support they need to substantially improve risk owner performance. | Matt Hoyles (Lead) | Breakout | D: Delivering Business Impact | Management Services - Technical | Group Live | Intermediate | None | None | 0.6 | 9/15/2026 | 11:00am - 11:30am |
| ERAC26 | 11e | How To Prepare for High-Impact Audit Committee Interactions | CAEs often provide details in their reporting that many audit committees (ACs) don’t want more of, and not enough of the directional information they do. As a result, board members are left unfulfilled from AC meetings and may seek the information they need for effective oversight and assurance elsewhere. Join this session to learn how to provide better insights in your reporting and interactions with the audit committee. | Tim Berichon (Lead) | Breakout | E: Enhancing Executive Leadership and Influence | Communications and Marketing - Non-Technical | Group Live | Intermediate | None | None | 0.6 | 9/15/2026 | 11:00am - 11:30am |
| ERAC26 | 12a | No Plan, No Payoff: AI Business Impact Demands a Clear Strategy | As enterprise AI adoption accelerates, many risk and assurance functions are using this technology. But without strategic planning, staff adoption will be fragmented and piecemeal, and impacts will be marginal at best. This session will guide Heads of Audit on the essential components of a functional AI strategy to set their teams up for AI success. | Eren Fry (Lead) | Breakout | A: Realizing Value from Technology and Analytics | Business Management and Organization | Group Live | Advanced | None | None | 0.6 | 9/15/2026 | 12:30pm - 1:00pm |

| | | | | | | | | | | | | | | |
|--------|-----|---|---|--------------------------|----------|--|--|------------|--------------|------|------|-----|-----------|------------------|
| ERAC26 | 12b | Managing Newly Emerged, Highly Interdependent Risks | Organizations face growing complex, interdependent risks that defy traditional categories (e.g., enterprise risk vs. emerging risk). ERM must shift to a “detect and coordinate” role, spotting misaligned responses and guiding targeted solutions. This session shows ERM’s unique impact in this role, with practical examples from leading teams to illustrate effective approaches. | Jim Mello (Lead) | Breakout | B: Accelerating Response to Emerging Risks | Management Services - Technical | Group Live | Intermediate | None | None | 0.6 | 9/15/2026 | 12:30pm - 1:00pm |
| ERAC26 | 12c | Audit’s Role in Elevating Management Risk Ownership | Chief audit executives (CAEs) are concerned that senior management’s level of risk ownership has not advanced to meet today’s risk environment. While many expect that delivering more value and insight through typical audit services will naturally inspire improvement, leading audit teams are achieving greater success by directly building better risk owners. Join this session to learn why this approach is so effective and hear best practice examples from top audit teams. | Brian Andersen (Lead) | Breakout | D: Delivering Business Impact | Business Management and Organization | Group Live | Advanced | None | None | 0.6 | 9/15/2026 | 12:30pm - 1:00pm |
| ERAC26 | 12d | Resilience Reimagined: Strategic Collaboration for Stronger ORM and Compliance | As boards take on more risk and make complex decisions in today’s volatile environment, the need for operational risk and resilience leaders across industries is greater than ever. Learn how integrating resilience principles into your operational risk management (ORM) strategy breaks down organizational silos, delivers a clearer view of risks and dependencies, and enables earlier anticipation and more effective response to disruptive events. | Julie Tani (Lead) | Breakout | D: Delivering Business Impact | Management Services - Technical | Group Live | Advanced | None | None | 0.6 | 9/15/2026 | 12:30pm - 1:00pm |
| ERAC26 | 12e | Building a Business-Led Compliance Operating System | Most programs push tasks into the business but never build the systems that make leaders own outcomes. Join this session and learn how to co-design a business-led compliance operating system: clarifying outcomes, embedding governance (roles, risk-domain ownership), activating incentives and peer transparency, building leader capability via coaching, and instrumenting measurement to sustain ownership. | Chris Audet (Lead) | Breakout | D: Delivering Business Impact | Business Management and Organization | Group Live | Advanced | None | None | 0.6 | 9/15/2026 | 12:30pm - 1:00pm |
| ERAC26 | 13a | Key Market Insights: Magic Quadrant for Governance, Risk and Compliance Tools | Over a hundred vendors claim to offer GRC tools — but which one is actually right for you? This session unpacks the Magic Quadrant for GRC solutions, cutting through the market clutter to help assurance leaders identify which platforms are built for real-world enterprise risk management — and which ones just look good on paper. | Jie Zhang (Lead) | Breakout | A: Realizing Value from Technology and Analytics | Computer Software and Applications - Non-Technical | Group Live | Advanced | None | None | 0.6 | 9/15/2026 | 2:30pm - 3:00pm |
| ERAC26 | 13b | Hot Spots Deep Dive | This session will provide a closer examination of one of Gartner’s 2027 Audit Plan Hot Spots. Attendees will get insight on the key drivers of the risk and learn how audit teams are planning risk coverage in the year ahead. | Devanshu Mehrotra (Lead) | Breakout | B: Accelerating Response to Emerging Risks | Auditing | Group Live | Overview | None | None | 0.6 | 9/15/2026 | 2:30pm - 3:00pm |
| ERAC26 | 13c | How to More Accurately Assess Your Compliance Program’s Effectiveness | Only 37% of compliance leaders feel fully confident assessing their compliance program’s effectiveness. Many rely on reactive methods, while those who are more confident tend to test program elements and employee activities against defined quality standards. Join this session to learn Gartner’s nine quality standards and how they can be leveraged to better assess the effectiveness of your compliance program. | Kelly Larmon (Lead) | Breakout | C: Transforming Functional Effectiveness | Business Management and Organization | Group Live | Intermediate | None | None | 0.6 | 9/15/2026 | 2:30pm - 3:00pm |

| | | | | | | | | | | | | | | |
|--------|-------|--|--|-----------------------------------|---------------------|--|--------------------------------------|------------|--------------|------|------|-----|-----------|-------------------|
| ERAC26 | 13e | Building a Trust-Based CFO-Risk Leader Partnership for Strategic Success | By fostering open communication, aligning goals and working collaboratively, the CFO and Heads of Enterprise Risk Management can build a strong, trust-based relationship that supports the organization's strategic objectives and enhances its ability to manage risk effectively. This session will focus on practical strategies for aligning business priorities and enabling proactive risk mitigation. | Janel Everly (Lead) | Breakout | E: Enhancing Executive Leadership and Influence | Personal Development - Non-technical | Group Live | Intermediate | None | None | 0.6 | 9/15/2026 | 2:30pm - 3:00pm |
| ERAC26 | SLRD2 | Senior Leadership Circle Research Discussion: Building a Business-Led Compliance Operating System | Most programs push tasks into the business but never build the systems that make leaders own outcomes. Join this session and learn how to codesign a business-led compliance operating system: clarifying outcomes, embedding governance (roles, risk-domain ownership), activating incentives and peer transparency, building leader capability via coaching, and instrumenting measurement to sustain ownership. | Chris Audet (Lead); James Crocker | Research Discussion | D: Delivering Business Impact | Business Management and Organization | Group Live | Advanced | None | None | 2.4 | 9/15/2026 | 2:30PM - 4:30PM |
| ERAC26 | 14a | Enhance ERM Risk Analysis With GenAI | While GenAI adoption in ERM is still rare, it could offer potential to automate activities like risk analysis and provide advanced analytics. Yet, only 10% of ERM leaders are confident in using GenAI for deeper insights and just 30% use technology for real-time reporting. As risk data grows more complex and expectations rise, ERM faces pressure to digitalize. Already, 12% have integrated AI into risk management activities, positioning themselves as early adopters. | Alex Ossington (Lead) | Breakout | A: Realizing Value from Technology and Analytics | Information Technology - Technical | Group Live | Advanced | None | None | 0.6 | 9/15/2026 | 4:00pm - 4:30pm |
| ERAC26 | 14b | Innovations in Risk Reporting | Gartner's Head of ERM Agenda Poll shows risk reporting is the No. 2 priority for Heads of ERM this year. Join this session to explore how leading ERM teams are innovating in the development and delivery of risk reporting. | Elliott Long (Lead) | Breakout | D: Delivering Business Impact | Management Services - Technical | Group Live | Intermediate | None | None | 0.6 | 9/15/2026 | 4:00pm - 4:30pm |
| ERAC26 | 14d | Quality Management: The Pathway to Internal Audit's Value | Over half of audit committee members identify delivering quality insights to the business as the most important criterion for evaluating the CAE. This expectation pressures CAEs to boost both the quality and value of audit engagements. Join this session and learn what defines and characterizes a quality management program for your audit function — one that not only aligns with the standards but also assures and demonstrates organizational value. | Tim Berichon (Lead) | Breakout | D: Delivering Business Impact | Business Management and Organization | Group Live | Intermediate | None | None | 0.6 | 9/15/2026 | 4:00pm - 4:30pm |
| ERAC26 | 14e | The Executive Guide to AI Governance for Assurance Leaders | Effective AI governance requires a strong operating model, clear policies, strict controls and enabling technologies. Organizations must balance AI's significant value with the risks of its growing criticality, scalability and democratization. This session, which leverages Gartner's AI Governance Playbook, will help you understand and execute your governance role to ensure AI systems are developed and deployed in a compliant, ethical, trustworthy and responsible manner. | Jaiman Patel (Lead) | Breakout | E: Enhancing Executive Leadership and Influence | Business Management and Organization | Group Live | Advanced | None | None | 0.6 | 9/15/2026 | 4:00pm - 4:30pm |
| ERAC26 | 21a | Best Practices to Turn the Executive Risk Committee Into a Driver of Action and Change | The executive risk committee is ERM's most important audience, yet too often ERC meetings serve only as an executive briefing rather than catalysts for needed actions to improve management of specific risks and overall risk governance. Join this session to learn how ERM leaders can unlock the full potential of their ERCs, including practical guidance on designing ERC agendas, pre-read materials and charters. | Jonathan Keeney (Lead) | Breakout | E: Enhancing Executive Leadership and Influence | Management Services - Technical | Group Live | Advanced | None | None | 0.6 | 9/16/2026 | 10:30am - 11:00am |

| | | | | | | | | | | | | | | |
|--------|-------|--|--|-----------------------|---------------------|---|---|------------|--------------|------|------|-----|-----------|-------------------|
| ERAC26 | 21b | From One to Many: Mapping AI's Impact Across the Risk Register | AI is rapidly reshaping risk profiles, but treating AI risk as a single item on the risk register creates blind spots. AI amplifies numerous other risks causing them to materialize differently and require different controls. This session breaks down AI-driven risks, maps them to existing risk domains and gives risk leaders practical tools to classify, document, and assess AI's impact more clearly and effectively across the risk register. | Tim Faulkner (Lead) | Breakout | B: Accelerating Response to Emerging Risks | Information Technology - Technical | Group Live | Intermediate | None | None | 0.6 | 9/16/2026 | 10:30am - 11:00am |
| ERAC26 | 21c | How to Scale AI Use in Audit | Enterprise AI tools are here, and audit departments are actively experimenting with tools and piloting use cases. But many struggle to take their use cases out of the pilot stage and embed them in audit methodology, resulting in limited impacts on departmental efficiency. Attend this session to learn about the strategies that leading audit departments have used to scale audit's use of AI tools to the next level. | Eren Fry (Lead) | Breakout | C: Transforming Functional Effectiveness | Information Technology - Technical | Group Live | Intermediate | None | None | 0.6 | 9/16/2026 | 10:30am - 11:00am |
| ERAC26 | 21d | Using Incident Data to Evaluate Risk Monitoring Activity Performance | Compliance teams struggle to know which monitoring activities actually detect real issues. Learn how Herbalife's CCO evaluates monitoring performance using precision and sensitivity, compares activity effectiveness across regions, retires low-value indicators, and strengthens risk detection using existing incident data. | Mara Lindokken (Lead) | Breakout | D: Delivering Business Impact | Information Technology - Technical | Group Live | Intermediate | None | None | 0.6 | 9/16/2026 | 10:30am - 11:00am |
| ERAC26 | 21e | The AI Future of Leadership of Management | Is AI going to replace you? Do you not even need entry level workers anymore because of AI? This session cuts through the hype of how AI will really impact leadership and management and provides a model for how leaders will leverage AI as a mentor, reviewer and sounding board to support them and their teams. | Drew Tanenbaum (Lead) | Breakout | E: Enhancing Executive Leadership and Influence | Personnel/Human Resources - Non-technical | Group Live | Overview | None | None | 0.6 | 9/16/2026 | 10:30am - 11:00am |
| ERAC26 | SLRD3 | Senior Leadership Circle Research Discussion: Audit's Role in Elevating Management Risk Ownership | CAEs are concerned that senior management's level of risk ownership has not advanced enough to meet the demands of today's risk environment. While many CAEs assume that delivering more value and insight through typical audit services will inspire management to make this improvement, some leading audit teams have succeeded by building stronger risk owners directly. Join this session to learn why this new approach for CAEs is so potent and learn best practices from leading audit teams. | Brian Andersen (Lead) | Research Discussion | D: Delivering Business Impact | Business Management and Organization | Group Live | Advanced | None | None | 2.4 | 9/16/2026 | 10:30AM - 12:30PM |
| ERAC26 | 22a | Getting Off to a Fast Start as a New CAE | First-time CAEs need to quickly understand the scope of their new role, stakeholder expectations for audit, and how both might differ from their past roles and experiences. This session will help new CAEs quickly and effectively meet expectations, align activities to the organization's top risks, build their executive brand, and deliver both short-term quick wins and long-term improvements in organizational value. | Louis Botes (Lead) | Breakout | E: Enhancing Executive Leadership and Influence | Personal Development - Non-technical | Group Live | Basic | None | None | 0.6 | 9/16/2026 | 12:00pm - 12:30pm |
| ERAC26 | 22b | Building Smart Data Governance for an AI-Driven Enterprise | AI models amplify existing data governance gaps, making it harder to find, control, and protect sensitive data in today's sprawling data environments. Yet many organizations lack tools to track and secure data or enforce evolving privacy rules. This session explores why AI increases these risks and how compliance and risk teams can close gaps before they lead to operational, legal, or reputational failures. | Chris Audet (Lead) | Breakout | B: Accelerating Response to Emerging Risks | Auditing | Group Live | Advanced | None | None | 0.6 | 9/16/2026 | 12:00pm - 12:30pm |

| | | | | | | | | | | | | | | |
|--------|-----|--|--|-------------------------|----------|--|---|------------|--------------|------|------|-----|-----------|-------------------|
| ERAC26 | 22c | Leverage AI for Dynamic Compliance Guidance Delivery | Compliance leaders are struggling to keep policies, training and communications current amid accelerating regulatory, technological and organizational change. This session highlights how generative AI can transform static guidance into a dynamic, continuously updated system that keeps pace with emerging risks, strengthening compliance effectiveness by speeding the path from risk insight to employee action. | April Lawrence (Lead) | Breakout | C: Transforming Functional Effectiveness | Information Technology - Technical | Group Live | Advanced | None | None | 0.6 | 9/16/2026 | 12:00pm - 12:30pm |
| ERAC26 | 22d | Audit at the Speed of Business: Strategies to Enable Audit's Timely Involvement in Transformation Initiatives | Organizations must respond to new disruptions, competitive pressures, models of working and other shifts. Enterprise leaders are asking CAEs to help navigate this surge of change by supporting a growing number of transformation projects critical to the organization's future. Join this session to learn how CAEs can improve insight delivery about the project environment and support their organizations in remaining competitive today and in the future. | Gisele Antunes (Lead) | Breakout | D: Delivering Business Impact | Auditing | Group Live | Overview | None | None | 0.6 | 9/16/2026 | 12:00pm - 12:30pm |
| ERAC26 | 23b | Building Business-Driven, Actionable KRIs | High-quality KRIs reveal risks early and prompt appropriate action, but current KRIs often lack the business context to engage leaders and drive response. This session shows how to develop better risk indicators by partnering with the business to build robust, data-driven KRIs. Learn strategies to make KRI development easier and more impactful for compliance and business teams. | James Crocker (Lead) | Breakout | B: Accelerating Response to Emerging Risks | Management Services - Technical | Group Live | Basic | None | None | 0.6 | 9/16/2026 | 2:00pm - 2:30pm |
| ERAC26 | 23d | Designing an Effective AI Upskilling Program for Audit, Risk and Compliance | GenAI promises to boost productivity and quality, but to achieve these ambitions at scale, leaders must develop their teams into creative, proficient and discerning users of GenAI tools. This session will present best practices for developing impactful AI upskilling programs, covering essential skill sets by role, innovative learning and engagement strategies, and key metrics to measure program effectiveness. | Gleb Zhukov (Lead) | Breakout | C: Transforming Functional Effectiveness | Personnel/Human Resources - Non-technical | Group Live | Intermediate | None | None | 0.6 | 9/16/2026 | 2:00pm - 2:30pm |
| ERAC26 | 23e | Use Risk Analytics to Drive Deeper Insights for ERM | Traditional qualitative techniques to assess risk and monitor exposure are too slow and subjective to drive effective decisions in today's fast-moving and information-rich environment. Advances in technology are lowering the barriers to a quantitative "risk analytics" approach. Attend this session to learn how risk analytics investments can unlock deeper, more timely insights for risk leaders. | Zachary Ginsburg (Lead) | Breakout | C: Transforming Functional Effectiveness | Management Services - Technical | Group Live | Intermediate | None | None | 0.6 | 9/16/2026 | 2:00pm - 2:30pm |
| ERAC26 | 24a | Enable Higher Impact Data Analytics for Audit | Chief audit executives continue to invest in broadening their teams' use of data analytics, often aiming to use analytics in every audit, yet anticipated transformative impacts have not materialized. Instead of driving towards broader usage, this session offers up a framework that will enable CAEs to prioritize the most promising opportunities and focus resources where they matter most. | Jonathan Keeney (Lead) | Breakout | A: Realizing Value from Technology and Analytics | Business Management and Organization | Group Live | Advanced | None | None | 0.6 | 9/16/2026 | 3:45pm - 4:15pm |
| ERAC26 | 24b | From Coordinated to Complementary: How to Refresh Your Aligned Assurance Strategy | Traditional aligned assurance efforts, focused on gaining efficiencies through coordination and relying on each other's work, often yield only incremental gains. Progressive risk leaders instead focus on pairing the distinct capabilities and advantages of second- and third-line functions to improve risk ownership across the business. Attend this session to learn how to revitalize your aligned assurance strategy to drive stronger risk governance. | Brian Andersen (Lead) | Breakout | C: Transforming Functional Effectiveness | Business Management and Organization | Group Live | Intermediate | None | None | 0.6 | 9/16/2026 | 3:45pm - 4:15pm |

| | | | | | | | | | | | | | | |
|--------|-----|--|--|------------------------|----------|--|---|------------|--------------|------|------|-----|-----------|-----------------|
| ERAC26 | 24c | Real-Time Risk Management | Risk management continues to operate on a fixed calendar: annual assessments and quarterly reporting. But as geopolitical shocks emerge overnight and reputational crises can unfold in hours, periodic risk processes are no longer sufficient. Attend this session to explore best-practice incentives and risk governance processes that enable organizations to detect signals early, mitigate impact quickly and maintain resilience under uncertainty. | Kevin Mercado (Lead) | Breakout | C: Transforming Functional Effectiveness | Management Services - Technical | Group Live | Advanced | None | None | 0.6 | 9/16/2026 | 3:45pm - 4:15pm |
| ERAC26 | 24d | Why Your Risk Appetite Statement Is Gathering Dust and How to Fix It? | Despite the time and effort invested in crafting risk appetite statements, many executives rarely use them to guide real-world decisions, leaving these documents to gather dust instead of driving business outcomes. Join this session to learn practical guidance for transforming risk appetite statements into effective, actionable tools that executives and senior leaders use to shape strategy, allocate resources and drive risk-balanced growth. | Alex Ossington (Lead) | Breakout | D: Delivering Business Impact | Management Services - Technical | Group Live | Basic | None | None | 0.6 | 9/16/2026 | 3:45pm - 4:15pm |
| ERAC26 | 24e | Architecting Your Approach to Navigating Ethical AI Dilemmas | As organizations expand AI deployments, it's essential for leaders to prioritize ethical practices and principles, especially as AI becomes integral to decision-making. Join this session to learn how compliance leaders can promote responsible and well-governed AI adoption throughout the organization, while also strengthening their role in aligning AI investments with business objectives. | Kelly Larmon (Lead) | Breakout | E: Enhancing Executive Leadership and Influence | Behavioral Ethics - Non-technical | Group Live | Basic | None | None | 0.6 | 9/16/2026 | 3:45pm - 4:15pm |
| ERAC26 | 25a | Ready Your Data for AI | AI-ready data is a key pillar for enabling AI-related ambitions; yet lack of data is a top barrier to implementing AI techniques for 40% of organizations. This session will share the key steps aligned with modern data management technologies and practices to ensure audit, compliance, and risk leaders and teams positioned for success. | Gleb Zhukov (Lead) | Breakout | A: Realizing Value from Technology and Analytics | Information Technology - Technical | Group Live | Intermediate | None | None | 0.6 | 9/16/2026 | 4:30pm - 5:00pm |
| ERAC26 | 25b | Auditing AI: Principles and Approaches | With AI adoption rapidly accelerating, providing assurance over enterprise deployments has become a mission-critical priority for audit departments. Yet many are struggling to determine when and how they should be providing assurance. Learn strategies for assuring your organization's use of AI and where other audit teams are prioritizing coverage of AI risks. | Les Beldo (Lead) | Breakout | B: Accelerating Response to Emerging Risks | Auditing | Group Live | Basic | None | None | 0.6 | 9/16/2026 | 4:30pm - 5:00pm |
| ERAC26 | 25c | Improve Audit Engagement Value Delivery by Strengthening Auditor Judgment | Business leaders want audits to add value, but many engagements fall short of expectations when auditors make judgment errors. Scope creep and cycles of revision and rework derail efficiency and cause audits to miss the mark. Attend this session to learn how CAEs can boost decision accuracy and engagement value by reducing unnecessary auditor judgment through clear boundaries, partial answers and guardrails. | Stephen Osborne (Lead) | Breakout | C: Transforming Functional Effectiveness | Personnel/Human Resources - Non-technical | Group Live | Intermediate | None | None | 0.6 | 9/16/2026 | 4:30pm - 5:00pm |
| ERAC26 | 25d | Reimagining the Compliance Operating Model for Speed, Insight and Impact | Static policies and reactive risk processes leave compliance struggling to keep pace with the business in today's volatile environment. This session presents the new compliance operating model required for today's environment – predictive, insight-driven, embedded in workflows and clearly aligned to business outcomes — and guides leaders on how to drive greater speed, impact and credibility. | April Lawrence (Lead) | Breakout | C: Transforming Functional Effectiveness | Business Management and Organization | Group Live | Intermediate | None | None | 0.6 | 9/16/2026 | 4:30pm - 5:00pm |

| | | | | | | | | | | | | | | |
|--------|-----|---|--|--------------------------|----------|--|------------------------------------|------------|----------|------|------|-----|-----------|-----------------|
| ERAC26 | 25e | Magic Quadrant for TPRM Solutions: Assurance Leaders | Third-party risk management (TPRM) is an increasingly complex, globally driven assurance priority. Organizations struggle with a fragmented TPRM technology landscape when seeking solutions to mitigate inherent third-party risk. In this session, learn how to evaluate, select and leverage TPRM technology solutions. | Antonia Donaldson (Lead) | Breakout | A: Realizing Value from Technology and Analytics | Computer Software and Applications | Group Live | Overview | None | None | 0.6 | 9/16/2026 | 4:30pm - 5:00pm |
|--------|-----|---|--|--------------------------|----------|--|------------------------------------|------------|----------|------|------|-----|-----------|-----------------|
