

Gartner Security & Risk Management Summit

9 – 10 March 2026 | Mumbai, India
gartner.com/in/security

Navigating today's toughest security and risk challenges

Gartner Security & Risk Management Summit brings together CISOs, cyber-risk managers, security managers and their teams to explore the evolving landscape of risks and strategies. Gain actionable business and technology insights into the challenges of increasingly complex cyber environments, addressing topics such as cybersecurity strategy and vision, leadership, metrics, risk and compliance management, cloud security, data security, AI, zero trust, security behavior and culture, and more.

Value in attending

- **Learn** how to prevent and respond to data breaches with real-world strategies from top experts.
- **Discover** ways to optimize your security budget and get more value from your investments.
- **Get** insights on recognizing and reducing burnout among security teams.
- **Discover** new approaches to protect sensitive data from today's most advanced threats.
- **Get** practical advice on managing the human side of cybersecurity, including employee awareness and insider threats.
- **Find** out how to protect your organization from ransomware and other fast-changing cyberthreats.
- **Hear** about the latest trends in cloud and infrastructure security to keep your systems safe.
- **Understand** how to measure and communicate cyber risk to your leadership team.

Gartner Security & Risk Management Summit

9 – 10 March 2026 | Mumbai, India
gartner.com/in/security

Agenda tracks

A. Cybersecurity Leadership

Cybersecurity leaders face disruptions on multiple fronts: technological, organizational and human. This track helps you to overcome day-to-day leadership challenges, make well-informed strategic decisions and keep your organization secure in turbulent times.

Hot topics

- Leadership vision for security
- Talent management
- Engagement with different parts of the organization
- Human factors in security
- Metrics, proving the value of security
- Cost optimization

B. Cyber-Risk Management

Excelling in risk management is not just essential — it's imperative. This track delivers insights to help you outpace potential threats, fortify your defenses and navigate and mitigate the intricate risks tied to privacy, supply chains and more.

Hot topics

- Organizational resilience
- Privacy
- Compliance
- Managing AI risks
- Understanding the threat landscape
- Third-party cyber-risk management
- Insider risk

C. Infrastructure Security

Securing infrastructure is key to any organization's security strategy, whether you are on-premises, in the cloud or hybrid. This track explores the evolving landscape of security solutions to secure your infrastructure and defend your organization from attack.

Hot topics

- Cloud security
- Network security
- Endpoint and mobile security
- Zero trust
- Cyber-physical security

What you can expect

- New Gartner insights on cost optimization, burnout, AI, human-centric security, talent crunch, third-party risks and more
- More than 50 sessions covering the most urgent security and risk topics
- One-on-one consultation with a Gartner expert to discuss your top challenges
- 35+ security and risk solution providers to discover, evaluate and test
- Building new relationships and broaden your perspective through peer engagement
- Inspirational keynotes and peer case studies to expand your thinking
- More than 20 global security and risk experts offering practical solutions to today's challenges

Gartner Security & Risk Management Summit

9 – 10 March 2026 | Mumbai, India
gartner.com/in/security

Agenda tracks (continued)

D. Application and Data Security

Applications and the data they support are critical security components for every organization. This track covers key technologies and approaches to protecting your data and securely building, implementing and operating your applications.

Hot topics

- Application security
- Data security
- Engineering secure applications
- Data loss prevention

E. Cybersecurity Operations

Security and risk management leaders depend on security operations to preserve their company, while business requires them to tolerate higher risks. This track explores the best practices and emerging approaches to reduce exposure to threats and minimize disruption caused by inevitable incidents.

Hot topics

- Future of the security operations center (SOC)
- AI and the SOC
- Ransomware
- Threat Intelligence

“Gartner is a great platform for collaboration and learning about the industry. It brings together emerging brands under one roof, providing a unique opportunity to discover what’s new. The carefully selected content helps you make informed decisions for your organization, ensuring you stay ahead in a rapidly evolving landscape.”

Ranjeet Rai
Head, Cybersecurity, Abbott

The CISO Circle Program*

CISOs must help their organizations manage cybersecurity risk while enabling growth and mission objectives. The CISO Circle Program curates the most executive-relevant Gartner insights and guidance in interactive, peer-based sessions.

What's included

- The opportunity to network and connect with a community of CISOs and CROs
- Exclusive interactive sessions focused on the most pressing priorities of CISOs and CROs
- CISO lunches, featuring keynote presentations from visionaries and industry leaders
- Priority access to book interactive sessions and one-on-one meeting with a Gartner expert
- Early access to keynotes throughout the conference (seating is not reserved and is available on a first-come, first-served basis).

*Preapproval is required; apply during registration.
