

Engage. Innovate. Lead.

In 2025, security and risk leaders must navigate rapid digital changes, harness AI and counter evolving threats. Success depends on collaborating with CISOs and teams to refine strategies and fortify defenses. Security professionals trust **Gartner Security & Risk Management Summit** to deliver answers at a conference shaped by data-driven research and insights from countless conversations between Gartner experts and the security community.

Explore insights from Gartner IT research

Gartner Predicts

Through 2025,

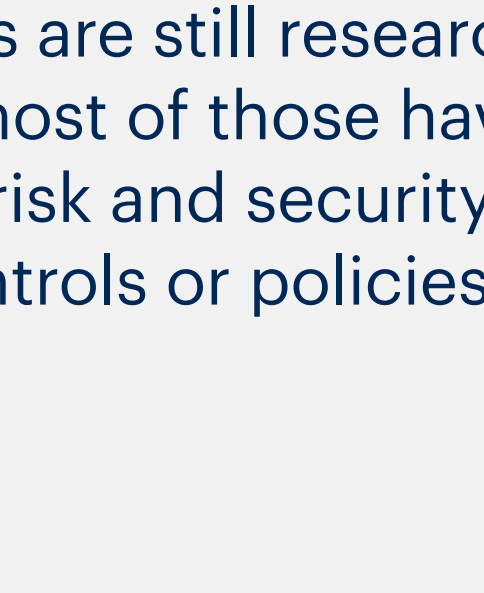

Generative AI will cause a spike of cybersecurity resources required to secure it, causing more than a 15% incremental spend on application and data security.

By 2027,

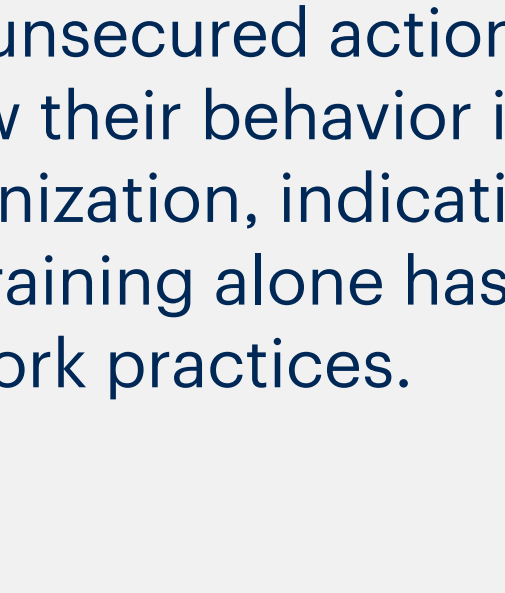

CISOs investing in cybersecurity-specific personal resilience programming will see 50% less burnout-related attrition than peers who don't.

Insight

Almost 90%

of enterprises are still researching or piloting GenAI, and most of those have yet to put AI TRiSM (trust risk and security management) technical controls or policies in place.

93% of employees

performing unsecured actions in the workplace already knew their behavior increased risk to their organization, indicating that security awareness training alone has little influence on employee work practices.

The Experience

Immerse yourself in two days of cutting-edge cybersecurity content, unparalleled networking opportunities and access to leading solution providers showcasing the latest technologies.

More than just a conference

Build new relationships, broaden your perspectives and uncover ways to solve problems alongside other CISOs and cybersecurity executives.

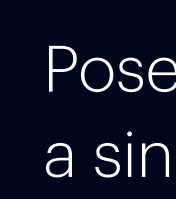

Workshops*

These interactive sessions explore proven solutions to real-life challenges with peers — all under the guidance of Gartner experts. (Preregistration is required.)

Roundtables*

Exchange insight and best practices with your peers on a specific issue in this small-group discussion, facilitated by Gartner. (Preregistration is required.)

Ask the Expert sessions*

Pose tough questions to a single Gartner expert in an intimate, topic-driven discussion with your peers. (Preregistration is required.)

Theater stage sessions

These brief presentations offer a snapshot of the current solution landscape. Exhibitors reveal products and Gartner experts give Magic Quadrant™ and Hype Cycle™ presentations.

Executive Stories

Hear directly from leaders across different organizations on their real-world challenges, successes and lessons learned along the way.

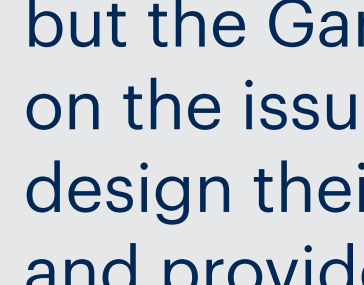

Gartner one-on-one meetings*

One 30-minute consultation with Gartner experts provides targeted, personalized advice to help you plan proactively and invest wisely. (Preregistration is required.)

*Online preregistration is required. These sessions are available to end users only; space is limited.

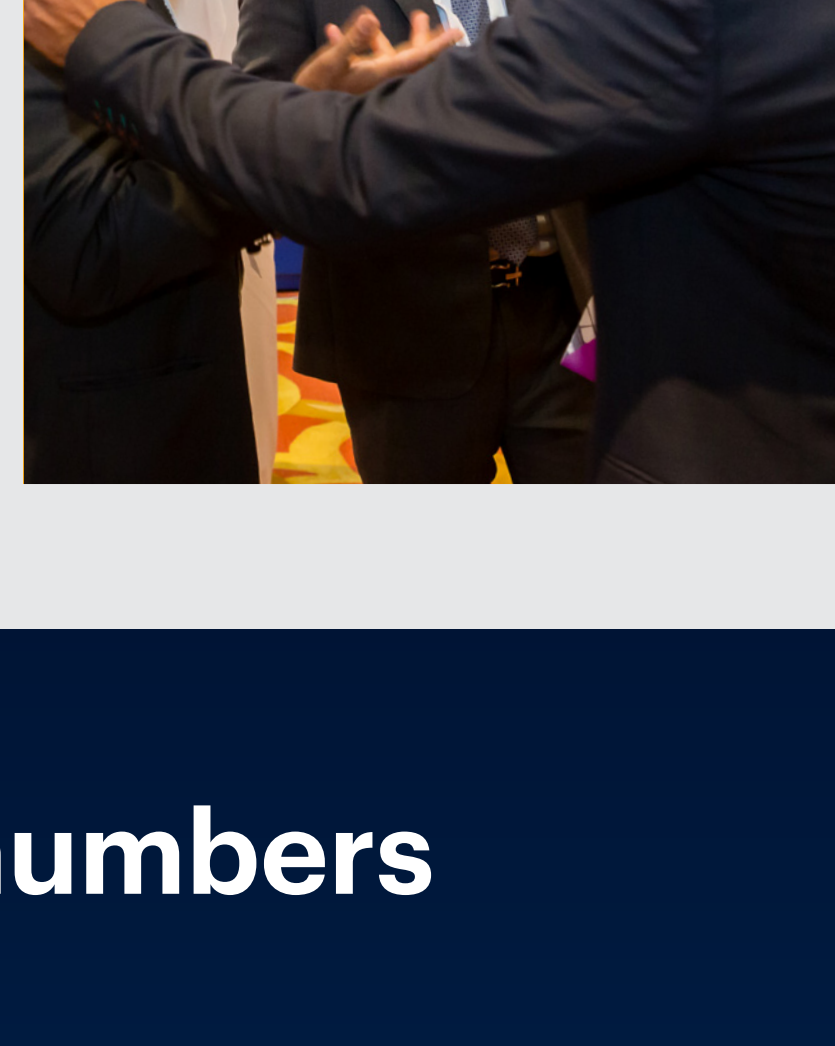

I have attended other conferences as well, but the Gartner conference is more focused on the issues we face in this region. They design their event to address these issues and provide the latest research, tactics and advice on how to tackle them."

Ali Al Majed, Group CISO, National Bank of Bahrain

The experience was fantastic, educational and provided a great sense of perspective across the industry to see and hear the concerns of cybersecurity professionals on the other side of the world."

Darrin Reynolds, CISO, Edgio

Quality presentations with incisive and interesting topics. Would recommend to cyber and risk professionals alike."

Craig Thompson, IT Risk Manager, Holland

Gartner opening keynote

Attend the Gartner opening keynote to explore what CISOs and cybersecurity leaders need to get right.

Harness the Hype: Turning Disruption into Cybersecurity Opportunity

Our organizations have grand ambitions and know they can't ignore cybersecurity. But in our fast-paced environment, we are endangered by the extremes of unbridled technology optimism and excessive preoccupation with risk. Hype, whether driven by AI, emerging technologies or the latest headline-grabbing cyber attack, threatens to derail strategic objectives and the partnership between cybersecurity and the rest of the business. This keynote helps cybersecurity leaders exploit the power of hype to drive an innovative and adaptive cybersecurity program.

Grow professionally

Continuing Professional Education (CPE)

CPEs can be claimed for ISASA and ISC2

Attendee Process

- Attendees can contact the Conferences team (Global Conferences@gartner.com) and provide the following:
 - Conference attended, region and dates
 - Full Name and email address used to register
- Conferences team member verifies conference and session attendance. Conference team member verifies number of content hours that are eligible for CPE. An email confirmation is sent back with a certificate of attendance.

- Attendee self-submits required documents to ISACA or ISC2. For ISACA, they should retain the documentation for 3 years.
