

Aligning Information Security with Business Goals for a Sustainable Future

Company: SSAB
Industry: Manufacturing
Employees: 10,000+

Mission-critical priority

Jukka Vuori, Chief Information Security Officer at SSAB, sought support from Gartner as the client worked to update and align their information security strategy with the company's transition to fossil-free steel. The client worked with Gartner to successfully achieve strategic objectives, enhancing their security program to support the company's greener future initiatives.

How Gartner helped

The client leveraged:

- Gartner provided guidance and support in **refreshing the information security strategy** to align with the client's transition to fossil-free steel.
- Gartner's **budget efficiency tools** were used to optimize the allocation of resources within the information security program.
- Gartner's conference sessions on **risk quantification** and **outcome-driven metrics** equipped the client with tools to measure and manage risks effectively.

Outcome

With support from Gartner, the client:

- Utilized **Gartner's Priorities Navigator for CISOs**, which provided a holistic view and facilitated informed decision-making by allowing the client to drill down into specific topics and access relevant research.
- Used Gartner's tools and insights to **support effective communication** between the information security team and the organization's leadership.

"With Gartner's guidance, we updated our information security strategy to align with our transition to fossil-free steel, ensuring our security program supports our sustainability goals." – **Jukka Vuori, Chief Information Security Officer at SSAB**
