

Build & Optimize Cybersecurity Program

Define Vision, Strategy & Operating Model

Determine a vision, strategy and operating model that can succeed in today's distributed, fast-changing environment.

Design & Optimize Security Tools & Services

Select, deploy and run the security products and services that help your organization mitigate the right cybersecurity risks and enable zero trust.

Secure Applications & Data

Enable secure innovation by protecting data and applications.

Source, Develop & Retain Talent

Develop a strategy to source, develop and retain talent on your team.

Assess & Manage Cyber Risk (Including Third-Party Risk)

Enable the organization to manage risks relating to privacy, safety and reliability.

Enable & Protect AI

Enable organizational AI strategy through proactive governance, risk management and cybersecurity innovation.

Communicate Risk & Value to Executives & Board

Select appropriate methods for communicating cybersecurity risk and value to executive leaders.

Obtain Defensible Budget

Develop and gain approval for a defensible cybersecurity budget.

Improve Personal Effectiveness

Identify the skills and behaviors required to improve personal effectiveness.

Increase Organizational Resilience

Improve org resilience in a world of increasing risk using foundational approaches such as business continuity management.

Influence & Drive Secure Behaviors & Culture

Drive secure behavior by attending to the user experience of security controls and building cyber judgment.

Stay Current on Cybersecurity Trends

Keep informed about new threats, trends and Gartner's research agenda.

Modernize Exposure Mgmt. & Security Operations

Identify and reduce cyber exposure and enable effective incident response.

Secure Enterprise Cloud Journeys

Design and implement security into cloud deployments from the inception of cloud migration plans.

Optimize Identity & Access Management

Manage and optimize an overall IAM program to support identity-first security and zero trust.

Implement Zero-Trust Strategy

Architect and deploy an effective zero-trust implementation.
