

# Modernizing Technology for a Sustainable Purpose

**Company Name:** Corporacion Andina de Fomento (CAF)  
**Industry:** Financial Services  
**Revenue:** 3.6B  
**Employees:** -870

## Mission-critical priority

Transition the primary data center and backup systems to the cloud, modernizing IT infrastructure and expanding capabilities. This transformation elevates the quality, reliability, and availability of technology services, and enables the implementation of new services, directly advancing CAF's Banco Verde sustainability strategy.

## How Gartner helped

The client used:

- **Strategic guidance** that led the project through its complex phases, ensuring alignment with industry best practices and innovative approaches.
- **Technology Roadmaps** that facilitated a seamless transition to the cloud, minimizing disruptions and ensuring continuity.
- **Gartner's risk assessment tools and frameworks** to identify potential challenges early on, allowing the team to implement effective mitigation strategies and ensure the project's success.

## Outcome

With support from Gartner for Practice, the client:

- **Saved 517 metric tons of CO<sub>2</sub>**, with an expected total of 337 metric tons saved from the Cloud Migration Project by year-end.
- **Improved operational efficiency** and enabled the team to focus on strategic goals, significantly reducing costs in data center operations and maintenance.
- **Achieved technological advancement**, and implementation of new services, as the cloud transition provided access to cutting-edge technology, and reliability without frequent modernization efforts.
