

How Gartner Helps the Central Bank of Luxembourg Accelerate Data Strategy

Company Name: Central Bank of Luxembourg
Industry: Public Sector
Employees: <500

Mission-critical priority

Arlind Doberdolani, Project Manager for Data Analytics at the Central Bank of Luxembourg, sought Gartner's support to overcome challenges in data and metadata management. The goal was to strengthen governance, enable actionable insights & accelerate the development of a robust data strategy.

How Gartner helped

Gartner for CDAOs and insights provided a data and analytics maturity assessment, helping benchmark current capabilities and identify key improvement areas.

With Gartner's expert guidance, the Central Bank defined a step-by-step data strategy, set clear midterm priorities, and efficiently evaluated and selected a data catalog solution - streamlining the entire process.

Outcome

- Accelerated data strategy implementation and reduced time to market.
- Efficient evaluation and adoption of the right data catalog tool.
- Enhanced data governance and metadata management for improved insights and operational excellence.

"Gartner helped us solve one of our key challenges on data and metadata management. We worked together on data governance and how to enable data for insights."
