

Logistics Cost Savings Through Process Optimization

Industry: Automotive Parts
Revenue: \$50 Million
Employees: 50-100

Mission-critical priority

Following the pandemic, the Automotive client began looking at process and organizational levers to optimize business costs

How Gartner helped

The client used:

- **Gartner Logistics Maturity Assessment tool** and research to identify areas to focus on for cost and efficiency
- **Gartner analysts review** best practice approaches for distribution center productivity and slotting optimization and recommended changes to the cycle-counting policy for inventory control

Outcome

With support from Gartner for Supply Chain, the client:

- **Identified potential for optimization** across multiple processes in the supply network
- **Reviewed and implemented changes** to outdated and redundant policies
