

Supply Chain Planning

End-to-End Supply Chain Decision-Centric Planning

Orchestrate aligned cross-functional decisions that deliver business objectives. Design, implement and evolve decision-centric processes to support integrated business planning

Demand Management

Manage demand despite volatility. Build the capability to create and align demand plans.

Supply and Inventory Management

Manage supply and inventory for growth, cost and risk. Develop capability for creating and aligning supply and inventory plans that deliver demand profitably.

Product Portfolio Management

Develop product portfolio planning process to manage product portfolio performance against business strategy and objectives.

Supply Chain Response Planning

Build realistic plans that feed execution and respond to variances between plans and actuals by implementing S&OE and a strong metrics framework.

SCP Digital Transformation Strategy

Develop strategies to digitally transform planning, optimizing automation and AI integration while effectively measuring success and preparing for future advancements.

SCP Technology Evaluation and Selection

Make informed supply chain planning technology decisions for evaluating and selecting vendors.

SCP Technology Implementation and Adoption

Leverage best practices for implementing supply chain planning technologies and maximizing user adoption.

Emerging SCP Tech and Trends

Develop strategies to integrate emerging technologies in supply chain planning, enhancing capabilities and driving innovation by leveraging evolving trends.

Performance Management

Define plans, metrics, and processes to meet expectations while balancing short-term cost and cash pressure.

Strategy Planning

Develop a future-focused, adaptive strategy and translate it into executable plans.

SC Planning Evolution and Change Management

Develop and advance the culture of planning across the organization, engaging with cross-functional stakeholders to effectively manage change.

Organizational Design and Talent

Design the organization and develop a talent strategy for supply chain planning to support current and future needs.

Strategy Execution & Tools

Ensure that the strategy execution is well-aligned with the overall strategy plan.
